

Reporting

At Advanced Clinical Laboratories we pride ourselves on delivering the best customer service and accurate reports in the industry. Through our streamlined processes and state of the art testing and reporting software we are able to deliver timely and accurate reports.

Results Delivery - Upon completion of the testing we can deliver the results immediately. The easiest way is to have ACL automatically fax the results upon completion of the test. You can also opt to have the results delivered in one batch at the end of the day.

If you currently have an EMR in place we can interface with your system to send results.

Record Retention Policy- The laboratory will keep and maintain records for a minimum of two (2) years. Records are maintained in a safe place and under proper storage conditions.
